Summary

A front-end developer with a keen eye to design and UI/UX, experienced with HTML, CSS, SASS, Tailwind CSS, JavaScript, and React/NextJS. Eager to contribute to the dev team with my coding skills, and improve my skill set in a professional environment.

Skills

HTML/CSS • SASS • Tailwind CSS • JavaScript • Typescript • React • Next.js • Git • GraphQL • Cypress • C# • Chakra UI • Mantine

Work Experience

Wordpress Developer
May 2019 – Dec 2019 • 7 mo

Dado Agency • Freelance/Part time

Remote

Technologies: WordPress • Wordpress custom themes • Wordpress plugin

Worked as a contract/freelance, helped the agency build and maintain websites, during my time worked

with 4 projects, in a fast-paced development environment.

Frontend Developer
May 2022 – May 2022 • 1 mo

Hamshack Radio • Contract

Remote

Technologies: Next.js • Strapi • Tailwind CSS • Typescript • React • GraphQL

Hamshack Radio is an online radio station, rebuilt their online website with live radio player

functionality, increasing page loading speed by 300% (6.6 seconds to 2.2 seconds). Improved user

experience with live radio player not pausing while navigating.

Frontend Developer
June 2022 – June 2022 • 1 mo

GYS Africa • Contract

Remote

Technologies: Next.js • Strapi • Tailwind CSS • GraphQL • Typescript • React

Worked on a contract basis, helped the online station, building their online presence, built and

designed their website, implemented new solutions to generate more revenue(events, merch) for the

client.

Projects

NewHome - House Marketplace
Feb 2022 – Feb 2022

Technologies: React • Firebase • JavaScript • Tailwind CSS

- NewHome is a House marketplace for people to add their properties as listings.
- Styling with Tailwind CSS, simple utility based CSS framework
- The application fetches data from the Firebase, and uses Firebase authentication

Feedback App

Jan 2022 – Jan 2022

Technologies: React • JSON-Server • Chakra UI • Framer Motion

Feedback App allows users to enter, edit, and delete reviews with rating selection and text description. Connected to a JSON-Server(Deployed on Heroku) to create a fake API.

- I didn't use a state management library like Redux on purpose. For this app using react context API is sufficient.
- Main focus of the project was to build a strictly frontend. That's why I decided to use an JSON-Server as a fake API endpoint rather than create a backend server.

Github Scout

Jan 2022 – Feb 2022

Technologies: React • Chakra UI • GitHub API • Framer Motion

Github Scout enables searching github users, and seeing their details more in depth, how many stars, followers, and etc.

- Styling and components with Chakra UI, simple and accessible component library.
- The application fetches data from the GitHub API

Educations

Bachelor's degree: Computer Science

Mar 2022 – Nov 2023 • 1 yr 8 mos

Varsity College

Cape Town, South Africa

IIE Bachelor of Computer and Information Sciences in Application Development

- Web Development (MERN Stack, .NET ASP)
- Cloud Development
- Database (NoSQL, and MySQL)
- Programming (C#, and Java)

Languages

English (Professional working proficiency)

Turkish (Professional working proficiency)
